NEW DELHI 3 (INDIA); }
The 20th March, 1950. }

S. P. JAIN,

for Registrar General, India.

**NATIONAL
SAVINGS
CERTIFICATES**

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 18th February, 1950.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 18th February, 1950 relate to 147 towns with an estimated population of 21,273 thousands. The total number of towns is 224 and their population is 27,926 thousands. Thus 66% of the total number of towns representing 76% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 11,113 and 7,408 representing birth and death rates of 27.1 and 18.1 per thousand of population respectively.

(A) States (Parts A and C):—The data here relate to 121 towns with an estimated population of 18,183 thousands. Information about Assam, Bihar and Madras could not be included. The total number of towns is 192 and their population is 24,354 thousands. Thus 63% of the total number of towns representing 75% of the total population is covered. The numbers of births and deaths recorded in these towns were 9,384 and 6,492 representing birth and death rates of 26.8 and 18.6 per thousand of popula-

tion respectively. The table at the end gives the position by states.

The town of Puri in Orissa was the only one which had a high death rate of 57.9 per thousand of population and this high rate was mainly due to deaths from dysentery and diarrhoea and fevers.

(B) States (Part B):—The data here relate to 26 towns with an estimated population of 3,090 thousands. The total number of towns is 32 and their population is 3,572 thousands. Thus 81% of the total number of towns representing 87% of the total population is covered. The numbers of births and deaths recorded in these towns were 1,729 and 916 representing birth and death rates of 29.1 and 15.4 per thousand of population respectively.

Rajkot in Saurashtra was the only one which had a high death rate of 51.3 per thousand of population and this high death rate was largely due to deaths from fevers and smallpox.
